

Datasheet

Butterfly valve

MTV/MTVF/MTVL

Si-205 EN

Edition: 2021-06

- Advanced triple eccentric design
- Designed for control and shut-off applications
- Designed for applications up to 350° C (662 °F)
- Tightness class in accordance with EN 60534-4 Class V as standard
- Solid seat made of stainless steel
- Wafer design (Mounted between flanges) alt. lugged and flanged design

Options

- Fire safe
- PTFE seat
- High temperature applications up to 550° C (1022 °F)

Product Information

Somas butterfly valves type MTV, MTVF and MTVL, are control, on/off and shut-off valves. These valves are designed to handle a wide range of liquids, gases and steam within a broad temperature range.

The MTV valve can be mounted between flanges and also supplied in lugged design.

The valve type MTVF is a full flanged butterfly valve.

The valves have an advanced triple eccentric design including a unique shape of the disc allows the use of a solid stainless steel seat.

The solid seat remains un-affected by high flow velocities and temperatures. A good valve function is achieved even on difficult applications.

Somas valves are delivered factory-tested and as complete units with actuators positioners and other accessories. The valves are ready for immediate installation/operation upon delivery.

Option

"Fire safe" (see datasheet Si-202 EN)

"Exhaust valve" (see datasheet Si-207 EN)

Tightness class

The tightness class is related to the chosen material in the seat ring.

Standard leakage class	Optional leakage class
EN 60534-4	EN 60534-4
PTFE - Class V	PTFE - Class VI
Metal - Class V	
	EN 12266-1
	PTFE - Rate B
	PTFE - Rate C
	Metal - Rate D

Pressure and temperature rating

Pressure, Bar, gauge

Minimum working temperature -60°. If lower temperatures are needed contact Somas.

Flange standard

Somas butterfly valve type MTV in this data sheet is of wafer type for mounting between flanges PN10 - 25.

The valve can also be delivered in lugged design, MTVL.

The butterfly valve type MTVF is equipped with flanges which can be drilled for PN10 - 25.

Both types of valve can also be drilled for mounting between flanges according to ASME.

When ordering, please always state the pressure rating of the counter flanges. See the valve specification system, code 13.

Seat design

The valves have a metal seat (type Y) according to code D.

PTFE and nickel alloy seat for firesafe design is available as an option.

Further technical information

Technical data for the materials used in the Somas valves, flange standard, steam data, etc. can be found in documents library on www.somas.se.

Data sheet Si-203 shows butterfly valve type VSS for nominal sizes above DN500.

Actuators and accessories

The valves can be fitted with Somas manual, on/off or control actuators in accordance with the selection table. The valves will then be delivered as tested units ready for installation, valves with hand levers are only leakage tested without hand levers installed.

In the documents library on www.somas.se there is also information about positioners, limit switches and solenoid valves.

We can also fit other types of actuators and accessories in accordance with your specification.

Max. allowable pressure drops/torque figures

Maximum allowable pressure drops are valid at 20° C (see below).

Valve DN	PN	Max. pressure drop. bar at opening angle			Torque min. at ΔP		Torque min. at ΔP		Torque max. shaft Nm
		0°	60°	80°	bar	Nm	bar	Nm	
80	25	25	13	4.4	≤ 10	100	> 10	120	150
100	25	25	13	4.4	≤ 10	120	> 10	165	220
125	25	25	15	5.8	≤ 10	165	> 10	180	220

500	25	15	4.4	1.19	≤ 6	1900	> 6	2700	3250

Supplemental information

Note: Use flat gaskets with the correct inside diameter to ensure that pressure is applied on the cover plate. Spiral-wound gaskets shall not be used.

For mounting between flanges according to PN10-25, the inside gasket diameter should not exceed the dimensions specified in the standard EN 1514-1.

For mounting between flanges according to Class 150 dimensions according to the standard ASME B 16.21 RF are valid where the following dimensions refer to the gasket.

Valve DN	Gaskets according to EN 1514-1			
	Max. Inside dia. di (mm)	Outside dia. (dy) (mm)		
		PN 10	PN 16	PN 25
80	89	142	142	142

Variants

The standard MTV valve is designed to be mounted between flanges (wafer), but is also available in lugged and flanged design.

Ordering

State desired valve according to the valve specification system below as well as type of actuator, positioner and accessories.

Temperature range

Seat	Max. temp.
A = PTFE (10 % carbon)	170° C
D = 1.4462 alt. 1.4470 (metal seat, type Y)	350° C ¹ 550° C ²
E = 1.4547	500° C
P = PTFE (fibreglass 15%)	170° C
N = 1.4835, seat type Y	550° C

Shaft	Max. temp.
A = 1.4460 alt. SS 2324-12	150° C
B = 1.4460 alt. SS 2324-12, hard chromed	350° C ¹ 550° C ²
C = 1.4460 alt. SS 2324-12, HiCo Gr 6 coated	350° C ¹ 550° C ²
G = 1.4404, hard chromed	
J = CK3MCuN / 1.4547	500° C
S = 1.4469 alt. 1.4410	150° C
T = Titan gr.2	200° C ³
Y = 1.4462 alt. 1.4470, hard chromed	150° C
Z = 1.4462 alt. 1.4470	350° C ¹ 550° C ²

Valve body	Max. temp.
A = CF8M/1.4408	550° C
E = CK3MCuN	500° C
H = 1.4470	250° C
S = Titan Gr C-2 / Gr 2	200° C
Z = 1.4469	250° C

¹ Check with Somas for temperatures between 350 and 550° C. At higher pressures for example steam turbine applications.

² At lower pressures for example exhaust applications.

³ seat, sealings and bearings may limit the temperature below 200° C.
